REPRODUCTION PARTS

TONY'S PARTS REPRO HI-PO BIG BLOCK EXHAUST MANIFOLDS

By far the biggest buzz in the repro parts world in 2021 was surrounding these picture-perfect cast iron reproductions of Chrysler's big block high-performance exhaust manifolds as used from 1970 to 1971 on virtually

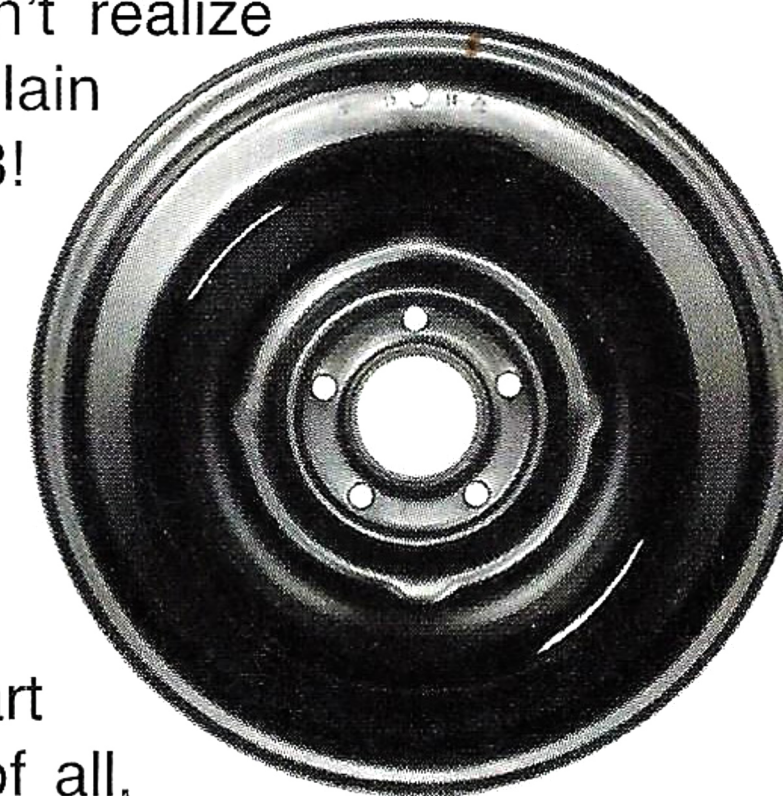

everything with a high horse engine in it. Correct from the factory part numbers, casting ID marks, and casting dates, these are identical copies of the long-gone originals and probably one of the most universally needed parts introduced last year. Licensed by Chrysler as an authentic repro part, these big beauties are absolutely perfect. For more info, contact Tony's Parts, at 302-398-0821.

TONY'S PARTS' 1972/1973 15X7" STEEL WHEELS

This was one that made us sit up and take notice, because unlike Tony, we didn't realize Chrysler used a different plain steel wheel in 1972 and 1973!

If you ordered 15" tires on your E-body or B-body in '72 or '73, these wheels were the only game in town, as the 15" Rallye wheel was discontinued at the close of 1971.

They have all the correct part numbers on them, and best of all, Tony can date code these at your request to fit the correct assembly date for your car. If you need one or a whole set, Tony's got ya' covered, and this is an extremely universally needed part. Well done for seeing the big void in the marketplace for these! For more info, contact Tony's Parts, at 302-398-0821.

HONORED TO MAKE THE LIST!
